**Stonehouse Building Products Offers
Solid Surface Vanity Tops for Better Value**

Florence, KY [April 15, 2005] – Stonehouse Building Products offers homeowners options for designer-quality solid surface bathroom vanity tops at a significantly lower cost than other premium vanity tops. Utilizing a unique technology, Stonehouse offers vanity tops that are durable, lightweight and easy to install, yet significantly less expensive than others in the category.

With Stonehouse products, homeowners can get a luxurious solid surface that provides long-term durability and beauty at an exceptional value. The innovative Stonehouse manufacturing process results in an approximately 1/8-inch solid surface layer permanently fused to an advanced composite base material, resulting in a one-piece solid vanity top that is impact resistant, repairable, non-porous, seamless and easy to maintain.

The Stonehouse palette includes 64 color options within four unique granite collections: Ultra, Medium, Fine and Solid. The Ultra Granite collection contains larger flecks of solid surface material creating a style that replicates the look of real granite. Both gloss and matte finishes are available. Six one-piece and three drop-in bowls are available to create the exact look to match a homeowner's style needs.

The vanity tops weigh about 65 percent less than a cultured marble top and require no special installation tools or preparation – enhancing the convenience for the do-it-yourself homeowner.

- more -

Stonehouse vanity tops are backed by a limited lifetime warranty and their non-porous surface means they are impervious to moisture and staining. If the vanity top becomes scratched, it can be easily sanded and buffed to look like new again.

Stonehouse vanity tops are all custom made to order and available at home improvement centers nationwide. Standard quick ship vanity tops take only one week to ship. Lead times for custom vanity tops are shipped in approximately three weeks.

Combining the luxurious look and unmatched durability of a high end solid surface with ease of installation and exceptional value, Stonehouse vanity tops offer homeowners an affordable choice for their bathroom design needs.

About Stonehouse Building Products

Stonehouse Building Products, headquartered in Florence, Ky., manufactures designer-quality solid surface vanity tops for home bathrooms. Stonehouse utilizes a proprietary production process to create custom vanity tops that offer all the luxury and durability of conventional solid surface materials at significant cost savings to the consumer. From its state of the art manufacturing facility, Stonehouse distributes its products to retail outlets across the country.
